THE PHILOSOPHICAL MAGAZINE

EDITOR
PROFESSOR SIR NEVILL MOTT, M.A., D.Sc., F.R.S.

EDITORIAL BOARD
SIR LAWRENCE BRAGG, O.B.E., M.C., M.A., D.Sc., F.R.S.
SIR GEORGE THOMSON, M.A., D.Sc., F.R.S.
W. H. TAYLOR, M.A., D.Sc.

VOL. X.—EIGHTH SERIES

JULY—DECEMBER 1964

LONDON:
TAYLOR & FRANCIS LTD. RED LION COURT, FLEET STREET, E.C.4

"Meditationis est perscrutari occulta; contemplationis est admirari perspicua.... Admiratio generat quæstionem, quæstio investigationem, investigatio inventionem."—*Hugo de S. Victore.*

——"Cur spirent venti, cur terra dehiscat,
Cur mare turgescat, pelago cur tantus amaror,
Cur caput obscura Phœbus furrugine condat,
Quid toties diros cogat flagrare cometas,
Quid pariat nubes, veniant cur fulmina cœlo,
Quo micet igne Iris, superos quis conciat orbes
Tam vario motu."

J. B. Pinelli ad Mazonium

5856.33

CONTENTS OF VOL. X. Nos. (103–108)

(EIGHTH SERIES)

NUMBER 103—JULY

PAGE

Internal Friction Near the Néel Temperature of Chromium. By Mark J. Klein, Metal Science Group, Battelle Memorial Institute, Columbus, Ohio 43201 1

Influence of Substrate Steps on the Arrangement of Defects in Evaporated Films. By J. W. Matthews and D. L. Allinson, Department of Physics, University of the Witwatersrand, Johannesburg 9

Deformation Structures in Zone-melted Molybdenum. By A. Lawley and H. L. Gaigher, The Franklin Institute Laboratories, Philadelphia 3, Pennsylvania 15

Equilibrium of Extended Dislocations within Edge Dislocation Dipoles. By H. S. Chen, J. J. Gilman and A. K. Head, Division of Engineering, Brown University, Providence, Rhode Island 35

The Thermoelectric Power of the Alloy Cu_3Au as a Function of Order. By G. Airoldi, C.I.S.E., Milano, M. Asdente, C.I.S.E. and Politecnico di Milano, and E. Rimini, Università di Catania 43

Some Factors in the Easy Axis Magnetization of Permalloy Films. By R. H. Wade, Cavendish Laboratory, Cambridge 49

Radial Streaking in Electron Diffraction Patterns from Cold-worked Metal Foils. By R. I. Garrod and M. R. Kindermann, Australian Defence Scientific Service, Aeronautical Research Laboratories, Department of Supply, Melbourne, Australia 67

Electron Microscopy and Diffraction of Aluminium Oxide Whiskers. By D. J. Barber, Aluminium Laboratories Limited, Banbury, Oxon 75

On the Formation of Fatigue Cracks at Twin Boundaries. By R. C. Boettner, A. J. McEvily, Jr. and Y. C. Liu, Scientific Laboratory, Ford Motor Company, Dearborn, Michigan, U.S.A. 95

A Generalized Large Deformation Behaviour for Face-centred Cubic Solids—High Purity Copper. By James F. Bell, The Johns Hopkins University, Baltimore, Maryland, U.S.A. 107

The Growth and Structure of Gold and Silver Deposits Formed by Evaporation Inside an Electron Microscope. By D. W. Pashley, M. J. Stowell, M. H. Jacobs and T. J. Law, Tube Investments Research Laboratories, Hinxton Hall, Cambridge 127

Correspondence :

Magnetic and Electrical Properties of some Ternary Mg–Mn–Al Alloys at Low Temperatures. By E. W. Collings, F. T. Hedgcock, W. B. Muir and Y. Muto, The Franklin Institute Laboratories for Research and Development, Philadelphia, Pennsylvania 159

Comments on Recent Work on the Annealing of Vacancy Defects in Gold Quenched in Different Atmospheres. By J. A. Ytterhus, R. W. Balluffi, J. S. Koehler and R. W. Siegel, University of Illinois, Urbana, Illinois 169

Image Overlap in Transmission Electron Microscopy. By J. H. Chute and J. G. Napier, Australian Atomic Energy Commission Research Establishment, Lucas Heights, Sydney, N.S.W., Australia 173

PAGE

The Electron Distribution in Chromium. A Correction. By M. J. Cooper, Crystallographic Laboratory, Cavendish Laboratory, Cambridge, England 177
Reviews of Books 179

NUMBER 104—AUGUST

Galvanomagnetic Size Effects in Indium Films. By K. Førsvoll and I. Holwech, Institute of Physics, University of Oslo, Blindern, Norway.. 181
Independent Slip Systems in Crystals. By U. F. Kocks, Division of Engineering and Applied Physics, Harvard University..... 187
The Dependence on Temperature and Strain Rate of the Flow Stress of Cyclically Hardened Copper Single Crystals. By N. J. Wadsworth and J. Hutchings, Royal Aircraft Establishment, Farnborough, Hants, England 195
Crystallography of Dislocations and Dislocation Loops in Deformed Iron. By S. M. Ohr and D. N. Beshers, Henry Krumb School of Mines, Columbia University, New York, New York..... 219
Note on the Potential of Ionized Impurities in Semiconductors. By P. Csavinszky, Texas Instruments Incorporated, Dallas, Texas..... 231
A Search for Conduction Electron Paramagnetic Resonance in White Tin. By A. D. Caplin, Royal Society Mond Laboratory, Cambridge.... 241
The Relationship between Bohr Magneton Number and Oxygen Deficiency in Nickel Ferrite. By D. Elwell and P. Parker, Department of Physics, Portsmouth College of Technology..... 253
Dislocation Configurations in Magnesium Oxide Observed by X-ray Topography. By A. R. Lang, H. H. Wills Physics Laboratory, University of Bristol, and V. F. Miuscov, Institute of Crystallography, Moscow 263
Transverse Magnetoresistance of High Purity Chromium Foils. By T. J. Bastow and R. Street, Department of Physics, Monash University, Clayton, Victoria, Australia..... 269
The Effect of Magnetic Domain Structure on Bragg Reflection in Transmission Electron Microscopy. By J. P. Jakubovics, Crystallographic Laboratory, Cavendish Laboratory, Cambridge..... 277
Equiatomic Transition Metal Alloys of Manganese. I. The Tetragonal PtMn Phase. By Kari Brun and A. Kjekshus, Chemical Institute A, University of Oslo, Blindern, Norway, and W. B. Pearson, Division of Pure Physics, National Research Council, Ottawa, Canada..... 291
The Stress-fields Around Groups of Dislocations in Face-centred Cubic Metals. By T. E. Mitchell, Cavendish Laboratory, Cambridge..... 301
The Detection of Secondary Slip during the Deformation of Copper and α-brass Single Crystals. By T. E. Mitchell and P. R. Thornton, Cavendish Laboratory, Cambridge..... 315
Correspondence :
Chemical Evidence for the Existence of Non-basal Dislocations in Graphite. By J. M. Thomas, C. Roscoe, K. M. Jones (Mrs.) and G. D. Renshaw, Department of Chemistry, University College of North Wales, Bangor, Caernarvonshire..... 325
Ordering and Segregation in Terms of the Polar Model of an Alloy. By Arthur Paskin, Brookhaven National Laboratory, Upton, New York..... 331

66-40769

V.10

PAGE

The Behaviour of Type II Superconductors. By A. M. Campbell, J. E. Evetts and D. Dew-Hughes, Department of Metallurgy, Cambridge 333

Flux Instabilities in Hard Superconductors. By J. E. Evetts, A. M. Campbell and D. Dew-Hughes, Department of Metallurgy, Cambridge University 339

Adsorption, Embrittlement and Stress-corrosion Cracking. By A. R. C. Westwood, E. N. Pugh and D. L. Goldheim, Research Institute for Advanced Studies, Martin Company, Baltimore, Maryland 345

The Motion of Abrikosov Vortices in a Type II Superconductor. By P. H. Borcherds, C. E. Gough, W. F. Nixen and A. C. Warren, Department of Physics, University of Birmingham 349

On the Minimum Creep Rate of β-cobalt. By T. A. Myers, Department of Metallurgy, The University, Manchester 13, and P. Feltham, Department of Physics, Brunel College, London, W.3 355

Reviews of Books 357

Book Notices 360

NUMBER 105—SEPTEMBER

Partial Dislocations Associated with NbC Precipitation in Austenitic Stainless Steels. By Jeanne M. Silcock, Central Electricity Research Laboratories, Leatherhead, England, and W. J. Tunstall, Cavendish Laboratory, Cambridge, England 361

Secondary Slip and Internal Stresses in Single Crystals. By U. F. Kocks, Division of Engineering and Applied Physics, Harvard University, Cambridge 38, Massachusetts 391

The Interaction of Dislocations in Anisotropic Face-centred Cubic Crystals. By L. J. Teutonico, Research Division, Republic Aviation Corporation, Farmingdale, New York, U.S.A. 401

Dislocation Nucleation in Sodium Chloride Crystals. By P. G. Deo and S. D. Sharma, Department of Applied Sciences, Panjab Engineering College, Chandigarh (India) 423

The Effect of Cycle Frequency and Atmospheric Corrosion on the Fatigue of Lead. By K. U. Snowden, The Baillieu Laboratory, Metallurgy Department, Melbourne University, Victoria, Australia 435

The Self-stress of Dislocations and the Shape of Extended Nodes. By L. M. Brown, Cavendish Laboratory, Cambridge 441

Intrinsic and Extrinsic Nodes in a Gold–Tin Alloy. By M. H. Loretto, Crystallographic Laboratory, Cavendish Laboratory, Cambridge 467

Low-temperature Optical Absorption of Nickel Fluosilicate Crystals. By M. H. L. Pryce, H. H. Wills Physical Laboratory, University of Bristol, G. Agnetta, Sezione Siciliana dell'Istituto Nazionale di Fisica Nucleare, T. Garofano, M. B. Palma-Vittorelli and M. U. Palma, Istituto di Fisica dell'Universita di Palermo 477

'Seeing' Dislocations in Zinc. By J. M. Schultz and R. W. Armstrong, Crystallogenics Section, Westinghouse Research Laboratories 497

The Microplastic Behaviour of Polycrystalline Nickel. By R. D. Carnahan and J. E. White, Materials Sciences Laboratory, Aerospace Corporation, El Segundo, California 513

Ice Nucleation by Photolyzed Silver Iodide. By G. Burley, National Bureau of Standards, Washington, D.C. 527

PAGE

Alpha-irradiation-induced Removal of Stacking-fault Tetrahedra in Quenched Gold. By R. M. J. Cotterill and M. W. Jones, Crystallographic Laboratory, Cavendish Laboratory, Cambridge, England 535
Reviews of Books 551

NUMBER 106—OCTOBER

The Thermopowers and Resistivities of the Primary Solid Solutions of Zinc, Gallium, Germanium and Arsenic in Copper. By R. S. Crisp, W. G. Henry and P. A. Schroeder, Division of Applied Chemistry, National Research Council, Ottawa, Canada 553
The Annealing of Neutron Irradiation Hardening in Copper Crystals. By M. J. Makin and S. A. Manthorpe, Metallurgy Division, A.E.R.E., Harwell, Berkshire 579
On Moiré Patterns in the Electron Microscopy of Polymer Crystals. By D. C. Bassett, Bell Telephone Laboratories, Incorporated, Murray Hill, New Jersey 595
The Reorientation and Termination of Dislocation Dipoles. By J. C. M. Li and P. R. Swann, Edgar C. Bain Laboratory for Fundamental Research, United States Steel Corporation, Research Center, Monroeville, Pennsylvania 617
The Pauli Susceptibility of Liquid and Solid Lithium. By J. E. Enderby, J. M. Titman and G. D. Wignall, Department of Physics, University of Sheffield 633
Theory of Impurity Diffusion in Metals. II. Homovalent Impurities. By A. D. Le Claire, Solid State Physics Division, A.E.R.E., Harwell 641
Strength-annealing Studies in Neutron Irradiated Copper-base Alloy Single Crystals. By T. J. Koppenaal, Metallurgy Division, Argonne National Laboratory, Argonne, Illinois 651
Formation of Colour Centres in Irradiated Alkaline Ice. By P. N. Moorthy and J. J. Weiss, School of Chemistry, The University, Newcastle upon Tyne, 1 659
The Effect of Flux Closure at the Edges of Thin Cobalt Films on Electron Microscope Images. By J. P. Jakubovics, Crystallographic Laboratory, Cavendish Laboratory, Cambridge 675
The Long-range Forces between Dislocation Loops and Dislocations. By M. J. Makin, Metallurgy Division, A.E.R.E., Harwell, England 695
The Magnetic Structure and Hyperfine Field of $FeGe_2$. By J. B. Forsyth and C. E. Johnson, Solid State Physics Division, Harwell, Didcot, Berks., and P. J. Brown, Cavendish Laboratory, Cambridge ... 713
Correspondence :
Stimulated Migration of Point Defects due to Electron Bombardment in the Electron Microscope, and its Possible Effect on their Clustering. By R. S. Nelson, Metallurgy Division, A.E.R.E., Harwell, Berks. 723
Grain Boundary Topography in Tungsten. By H. F. Ryan and J. Suiter, Physical Metallurgy Section, C.S.I.R.O., Baillieu Laboratory, University of Melbourne 727
The Stacking-fault Energy of Silver. By M. H. Loretto, L. M. Clarebrough and R. L. Segall, Division of Tribophysics, Commonwealth Scientific and Industrial Research Organization, University of Melbourne 731

PAGE

A Note on " Thermoelectricity in the Intermediate State ". By C. A. Renton, University of Pennsylvania, Philadelphia 4, U.S.A..... 733

Ordering of the Phases CoAl and NiAl. By M. J. Cooper, Crystallographic Laboratory, Cavendish Laboratory, Cambridge, England. 735

NUMBER 107—NOVEMBER

Identification of Prismatic Loops in Zone-melted Molybdenum. By A. Lawley and J. D. Meakin, The Franklin Institute Laboratories, Philadelphia 3, Pennsylvania..... 737

The Freezing of Some Continuous Binary Eutectic Mixtures. By D. J. S. Cooksey, D. Munson, M. P. Wilkinson and A. Hellawell, Department of Metallurgy, Oxford University..... 745

The Interaction of Fast-moving Dislocations. By J. A. Venables, Materials Research Laboratory, and Department of Physics, University of Illinois, Urbana, Illinois..... 771

The Effect of Crystallization Conditions on Radiation-induced Cross-link Formation in Polyethylene. By T. Kawai and A. Keller, H. H. Wills Physics Laboratory, University of Bristol, Royal Fort, Bristol 8, and A. Charlesby and M. G. Ormerod, Physics Department, Royal Military College of Science, Shrivenham, Swindon, Wilts..... 779

On Misfit Dislocations in the Diffusion Zone of a Bicrystal System. By J. S. Vermaak and J. H. van der Merwe, University of Pretoria, Pretoria, South Africa..... 785

The Production of Electrostatic Potential Differences in Sodium Chloride Crystals by Plastic Compression and Bending. By R. W. Whitworth, Department of Physics, University of Birmingham..... 801

Initial Oxidation Rate of Pure Iron and the Effect of the Curie Temperature. By J. C. Measor and K. K. Afzulpurkar, Department of Metallurgy, Battersea College of Technology, London, S.W.11..... 817

The Influence of Surface Structure on a Tarnishing Reaction. By J. G. Allpress and J. V. Sanders, Commonwealth Scientific and Industrial Research Organization, Division of Tribophysics, University of Melbourne 827

Relationship Between Flow Stress and Atomic Order in the FeCo Alloy. By M. J. Marcinkowski and Henry Chessin, Edgar C. Bain Laboratory for Fundamental Research, United States Steel Corporation, Research Center, Monroeville, Pennsylvania..... 837

Stress Dependence of the Transition Behaviour in Multi-mechanism Creep Reactions: with Special Reference to Zinc. By J. E. Flinn, Argonne National Laboratory, Argonne, Illinois, and D. E. Munson, Sandia Laboratory, Albuquerque, New Mexico..... 861

Electron Transport Properties in a Liquid Alloy. By N. Cusack, P. Kendall and M. Fielder, Physics Department, Birkbeck College, London, W.C.1..... 871

Correspondence:

Dislocation Structures in Fatigued Copper Single Crystals. By E. E. Laufer and W. N. Roberts, Metal Physics Section, Physical Metallurgy Division, Mines Branch, Department of Mines and Technical Surveys, Ottawa, Canada..... 883

Plastic Deformation of Diamond. By C. Phaal, Adamant Research Laboratory, Johannesburg, South Africa..... 887

PAGE

Interaction between Point Defects and Sn Atoms in Neutron Irradiated Al–Sn Alloy. By S. Ceresara and T. Federighi, Istituto Sperimentale Metalli Leggeri, Novara, Italy, and F. Pieragostini, SORIN, Saluggia, Italy 893

Observation of the Magneto-electric Effect in Polycrystalline Chromium Oxide. By T. H. O'Dell, Department of Electrical Engineering, University of Bristol 899

The Effect of Dispersed Oxides on Strain-hardening in Polycrystalline Copper. By F. P. Bullen, N. E. Ryan and C. B. Rogers, Aeronautical Research Laboratories, Australian Defence Scientific Service, Melbourne, Australia 903

Vacancy Diffusion in Dilute Alloy. By C. P. Flynn, Department of Physics and Materials Research Laboratory, University of Illinois, Urbana 909

Note on the paper of Ceresara, S., Federighi, T., and Pieragostini, F. entitled: "Pre-precipitation Rate in Al–10% Zn Alloy Neutron-irradiated at 78°K". By W. Schüle, Chemistry Department, Solid State Physics, C.C.R., Euratom, Ispra 913

Reviews of Books 917

Book Notices 920

NUMBER 108—DECEMBER

Sondheimer Oscillations in the Hall Effect of Aluminium. By K. Førsvoll and I. Holwech, Institute of Physics, University of Oslo, Blindern, Norway 921

Trigon Patterns on Etched Calcium Fluoride Cleavages. By A. R. Patel, K. N. Goswami and C. C. Desai, Physics Department, Sardar Vallabhbhai Vidyapeeth, Vallabh Vidyanagar, India 931

The Effect of Thickness on the Distribution of Dislocations in Cold-rolled Aluminium. By R. K. Ham and M. G. Wright, Department of Metallurgy and Metallurgical Engineering, McMaster University, Hamilton, Ontario, Canada 937

The Crystallography and Burgers Vectors of Dislocation Loops in α-uranium. By B. Hudson, Metallurgy Division, A.E.R.E., Harwell, Berks 949

Dislocation Rearrangement in Fatigue-hardened Aluminium During Preparation for Transmission Electron Microscopy. By J. C. Grosskreutz and G. G. Shaw, Midwest Research Institute, Kansas City, Missouri 961

The Deformation of Polycrystalline Tungsten at 200°C. By A. Wronski and A. Fourdeux, Union Carbide European Research Associates, s.a., 95 rue Gatti de Gamond, Bruxelles 18, Belgium 969

The Influence of Indium and Gallium on the Lattice Spacings of the β' and ζ Phases of the Silver–Zinc Alloys. By W. D. Hoff, R. P. Stratton and W. J. Kitchingman, Metallurgy Department, Faculty of Technology, University of Manchester 979

Crystal Growth and Orientation in Sputtered Films of Bismuth Telluride. By M. H. Francombe, Philco Research Laboratory, Blue Bell, Pa., U.S.A. 989

The Elastic Interaction between Edge Dislocations and Dipoles. By J. V. Sharp and M. J. Makin, Metallurgy Division, A.E.R.E., Harwell .. 1011

PAGE

Dislocation Dipoles in Deformed Copper Single Crystals. By J. T. Fourie, National Physical Research Laboratory, Council for Scientific and Industrial Research, Pretoria, South Africa 1027

On the Effect of the Crystalline Structure on the Form of Fatigue Curves: The Case of Iron Nickel Alloys. By A. Ferro and G. Montalenti, Istituto Elettrotecnico Nazionale G. Ferraris, Torino.. 1043

Variation with Temperature of the Velocity of Transverse Elastic Waves in Solid Argon. By G. O. Jones and A. R. Sparkes, Department of Physics, Queen Mary College (University of London), London, E.1... 1053

Variation with Temperature of the Refractive Index and Lorentz–Lorenz Function of Solid Argon. By A. J. Eatwell and G. O. Jones, Department of Physics, Queen Mary College (University of London), London, E.1. 1059

Correspondence :

Vacancy Annealing in Quenched and Deformed Gold: Tetrahedron Formation at Vacancy Type Dislocation Debris Along ⟨110⟩ Directions. By D. N. Seidman and R. W. Balluffi, Materials Research Laboratory and Department of Mining, Metallurgy and Petroleum Engineering, University of Illinois, Urbana, Illinois... 1067

Precipitation of $M_{23}C_6$ Lamellae at Non-coherent Growth-twin boundaries. By B. Hattersley and M. H. Lewis, Department of Metallurgy, Oxford University, Oxford, England..... 1075

On Strain Effects around Inert Gas Bubbles in Solids. By L. M. Brown and D. J. Mazey, A.E.R.E., Harwell..... 1081

Perfection of Epitaxial Silicon Layers Grown by the Pyrolysis of Silane. By G. R. Booker, Cavendish Laboratory, University of Cambridge and B. A. Joyce and R. R. Bradley, Allen Clark Research Centre, Plessey-UK Limited, Caswell, Towcester, Northants..... 1087

Stacking Fault Energies of Ni–Co–Cr Alloys. By E. H. Köster, A. R. Thölén and A. Howie, Cavendish Laboratory, Cambridge. 1093

Stress Field of a Dislocation Segment. By James C. M. Li, Edgar C. Bain Laboratory for Fundamental Research, United States Steel Corporation, Research Center, Monroeville, Pennsylvania..... 1097
